Let's discuss

The FUTURE of Faith & Belief

The search for enlightenment is discovery from within. The person who is honourable, honest and straightforward will interrogate and question themselves on their decisions. Self-circumspection shows the answer and disclosure of doing right or wrong. It is easy to choose a religion that best suits your needs and harder to question its selection. Here, faith and belief enter the arena. Errors occur trying to reconcile between divinity and science. Do you believe the Holy Book or scientists? Did the earth form in six days or 4.3 billion years and then cooled down after approximately 200 million years? Both these representations made by men who were scholars of divinity and scientists. Before the earth reached its present form, it is logical that days and nights can only exist by planetary rotation.

Is it possible for divinity and science to coexist? Jehovah or God in dictionary terms means: perfect, omnipotent, omniscient, a ruler of the universe - a force, an effect, or an aspect of this being. A being of supernatural powers or attributes believed in and worshipped by a people, an image of a supernatural being - an idol. One that is worshipped idealised or followed. No one has ever seen God, the symbol of the word meaning belief and faith. Many men have written Holy Books from their imaginative minds or dream sequences. There have also been many Gods conceived throughout the ages.

The concept now being realised is that mathematics and science are also of a divine nature. Equations created and formulated that ultimately will prove the point that a divine force does exist. The word 'GOD' is now obsolete and a new name category would be 'The Supreme Divine Source'. Here a link is established to the 'Divine Source Code' that is in every living being and all things inanimate, and is in line with Christian thinking of the Holy Ghost. The DSC is still the unknown essence or forces that yet needs identifying.

The mind or brain is the most complex part of the human body, a primary centre for regulation and control of bodily activities. It sends and receives complex impulses throughout its system. A centre of consciousness in thought, emotion and memory. That centre also contains a quantum essence, or aura that will soon be discovered hurling humankind into a new era of discovery. Already slightly identified, believed, and named as psychic ability, the Holy Spirit or Holy Ghost. The release of these equations of divinity will eventually release a worldwide ecstasy of wisdom and enlightenment.

In the future, we may see equations of divinity, as we all can astral travel and see the wonders of the cosmos. We shall all witness a sudden realisation of a new age of enlightenment. Until then we may only read fiction stories of the coming event.

An exploration of the cosmos in mathematical terms in the new ebook - Adventures in Space & Fiction Fantasy. Four new short stories available at:
